VCE Software Development: School-assessed Task 2025						
Assessment Criteria	**Levels of Performance**					
	Indicators	Not shown	1–2 (very low)	3–4 (low)	5–6 (medium)	7–8 (high)	9–10 (very high)
Unit 4 Outcome 1 10. **Skills in evaluating the solution and assessing the project plan.**	• Documents the evaluation of the efficiency and effectiveness of the software solution.	Insufficient evidence	Identifies measures to evaluate whether the software solution has met solution requirements.	Outlines the evaluation criteria from Criterion 4 required to evaluate the efficiency and effectiveness of the software solution.	Uses the evaluation criteria from Criterion 4 to evaluate the efficiency and effectiveness of the software solution, and the extent to which it meets the functional and non-functional requirements.	Explains how the evaluation criteria has been measured to evaluate the efficiency and effectiveness of the software solution.	Proposes an evaluation strategy to be conducted sometime in the future to evaluate the efficiency and effectiveness of the software solution that includes: • the time frame for the evaluation to be conducted • the evaluation criteria to be used • the individuals to conduct the evaluation and their responsibilities.
	• Documents evidence of critical and creative thinking through the evaluation of the analysis, design and development stages and improvements to the software solution.		Identifies features of the software solution that meet functional and non-functional requirements.	Outlines the process of developing the software solution through the analysis, design and development stages.	Evaluates the use of the analysis, design and development stages in developing the software solution.	Critically evaluates the process of developing the software solution, from start to finish, through the analysis, design and development stages, and how this process assisted in meeting requirements.	Discusses and justifies improvements that could be made to the software solution by approaching the analysis, design and development stages differently.
	• Documents the modifications made to the initial project plan throughout the duration of the project.		Lists modifications to the tasks during the project.	Uses annotations to outline the modifications made to the initial project plan.	Uses annotations to describe the modifications made to the initial project plan.	Uses adjustments or logs/journals to document and explain the modifications made to the initial project plan.	Evaluates the modifications made to initial project plan.
	• Assesses the effectiveness of the project plan.		Lists factors that contributed to the effectiveness of the project plan.	Outlines the changes made to the project plan and how they impacted the effectiveness of the project plan.	Describes the reasons why changes were made to the project plan and how they impacted the effectiveness of the project plan.	Discusses how the changes made to the project plan impacted the completion of the project and the effectiveness of the project plan.	Evaluates the changes made to the project plan, with evidence, and how these changes impacted the completion of the project and the overall effectiveness of the project plan.
